

Press Release March 17 2008

**EnergyMate
Your best mate for Energy Compliance.**

Calling all builders, architects and building designers. If you need help complying with the 5-star energy requirements of the South Australian Housing Code, EnergyMate is the answer.

EnergyMate is a new web based application that helps you self-assess for compliance with Appendix H of the code. It is quick, easy ...and always right!

Currently, building professionals have to rely on external assessors (which can become costly) or risk that the application will comply. If it doesn't you are faced with costly and time consuming changes before your application is approved.

Why risk it?

Now EnergyMate takes the headache out of compliance. From just \$55 per house, you can ensure compliance and get a professional report for Council to further aid quicker development approvals.

How does it work?

EnergyMate does all of the work for you. Simply enter the details requested (all information on building plans) and the EnergyMate calculator delivers the verdict. Not only has EnergyMate been reviewed by Planning SA and found to meet the requirements of Appendix H, the system has been tested by builders and Councils with guidance from HIA. And it is right every time!

"We have watched closely the development of EnergyMate and believe it is an accurate and reliable tool to ensure compliance, saving both time and money for our members"
Kent Hopkins, Building Services and Training Manager, HIA

It's easy

If working from plans, EnergyMate takes less than 15 minutes to deliver its verdict and you can make unlimited modifications until compliance is gained, paying only when EnergyMate advises you of compliance.

"We aimed to develop something that would take the risk out of energy compliance and save builders time and money. EnergyMate does just that".

Michael Terrington, Director, Sarugo (developers and owners of EnergyMate)

Q & A's

Can I use EnergyMate if I am not a builder?

Absolutely! EnergyMate is designed to be very easy to use. If you've been able to draw your own plans for application to council, then you can use EnergyMate!

Can EnergyMate be used for extensions?

Yes. The energy requirements apply to extensions as well as new dwellings. EnergyMate can handle all types of buildings.

How do I purchase EnergyMate?

EnergyMate works on a system of pre-paid credits. Each report you produce requires 1 credit. Credits can be purchased individually or in blocks. You can create as many draft projects as you have credits. A draft project is a project that has not been finalised.

How can I be sure the system is correct?

EnergyMate has been developed in conjunction with the HIA. It has been tested by Councils and builders and Planning SA has stated that; 'EnergyMate been reviewed by Planning SA and found to meet the requirements of Appendix H'.

Who is behind EnergyMate?

EnergyMate is brought to you by Sarugo a software engineering company specialising in providing Java software development services to local and international customers.

Sarugo Pty. Ltd.

Level 2, 44 Gawler Place, Adelaide, SA, 5000.
